

MINI ORIGINAL VALVE

Quarter-turn straight ball valves for surface mounting.

- European Brass, DW (4MS) quality for use in drinking water installations.
- The knurled inlet thread (according to model) make it easy to apply the sealant.
- 100% valves are tested for inner leakage.
- Double o-ring, ensures external leaktightness.
- Strong one-piece body construction for secure installations.

TECHNICAL SHEET MINI ORIGINAL VALVE

PRODUCT DESCRIPTION

Quarter-turn straight ball valves for surface mounting with manual operation, where the connection is made by means of a threaded connection, compression or loose nut according to model.

PRODUCT SCOPE

Designed for indoor plumbing installations, allowing individual shut-off of the water supply to sinks, washbasins, cisterns, washing machines, and other points of use.

Kv (m³/h), cubic meters per hour that flow through the valve generating a loss of 1 bar pressure.

INSTALLATION AND OPERATION INSTRUCTIONS

Before performing any action, the water supply to the installation should be shut off. Make sure there is no dirt or foreign objects in the connection to the network. Apply the appropriate sealing material to the inlet thread of the valve. The valve should be installed with a suitable tool, preferably with a wrench to hold the body. The tool should act on the flat surfaces of the valve body to avoid deforming this area due to excessive pressure from the tool. Restore the water supply and check the tightness of all connections before fixing the valve to service.

Do not alter the assembly of the valve components; replacement or disassembly of the handle may cause external leaks. Quarter-turn valves should always operate in a fully open position.

All products have an environmental impact during its life cycle, even once retired. All the components of this product can be recycled. Once the use is over, leave the valve in any recycling green point. Válvulas Arco reserves the right to change the product or any of its technical specifications without prior notice.
